RESTORE2 / HEALTH CHECK TRAINING

This 4 Hour course will provide learners with the skills and confidence when taking and recording the vital signs of an individual's state of health.

The course provides information on why taking and monitoring vital signs is important, and how to effectively take, monitor and record the results.

Learners will understand what to do if there is a suspected deterioration of an individual's health, and how to progress the most appropriate escalation pathway to support someone's health needs.

Training is at our Training Suite in Wakefield or a venue of your choice.
