

NEUROLOGICAL TRAINING

This course provides learners with the knowledge and practical understanding to recognise, respond to and support individuals living with neurological conditions, including Stroke, Parkinson's Disease and Multiple Sclerosis.

Participants will develop a clearer understanding of how neurological conditions affect the brain, mobility, communication and daily living, enabling them to provide safe, compassionate and person-centred support that improves quality of life.

Learners will be able to:

- Understand what neurological conditions are and how they affect the brain and body
- Recognise the signs and symptoms of Stroke, Parkinson's Disease and Multiple Sclerosis
- Understand how these conditions may impact mobility, communication and independence
- Recognise the actions to take if someone is experiencing a Stroke
- Understand prevention and risk factors associated with neurological conditions
- • Explain how to provide person-centred care and ongoing support for individuals living with neurological conditions

Training is held at our Training Suite in Wakefield
